

Got Questions? "Millennium Tracking" Has Answers!

"Where's Joe?"

The **Millennium Tracking** map shows you where Joe, and your other drivers are now. And the reporting and search tools show you where Joe was up to 1 year ago. You'll know if your drivers are doing their jobs.

"Is Joe driving safely?"

Millennium Tracking makes monitoring driver speed easy. You can know how fast your drivers are driving now, or you can call up past data using the **Millennium Tracking** report builder.

"Do I need another vehicle?"

Maybe. Maybe not. Nothing tells the story like a picture. The **Millennium Tracking** map makes it easy to spot route overlap and make decisions based on hard data instead of guess work.

"Why did fuel costs increase?"

Millennium Tracking can show you routes driven in an easy to use graphical format. You'll see where route overlaps occurred and how much they cost. With accurate information you'll be able to make changes that eliminate duplicate driving. **"Who's Closest?"**

Enter an address and the **Millennium Tracking** finds the closest driver. This is a perfect solution for businesses that need to make rapid adjustments to customer needs. Only real-time tracking can solve real-time dispatching problems.

How "Millennium Tracking" Works

Our tracking devices obtain location coordinates from GPS satellites and send this information to our servers every few seconds. Users can then see the most recent location, speed, and direction on our web-based map.

The "Millennium Tracking" Advantage!

Affordable

Startup cost per vehicle is only \$399 per unit per vehicle plus installation and our monthly charge is \$19.99 per unit. At these prices you can't afford not to try **Millennium Tracking**!

Easy to use

Our secure map and reporting system is web based. Just log in with your favorite browser and get started.

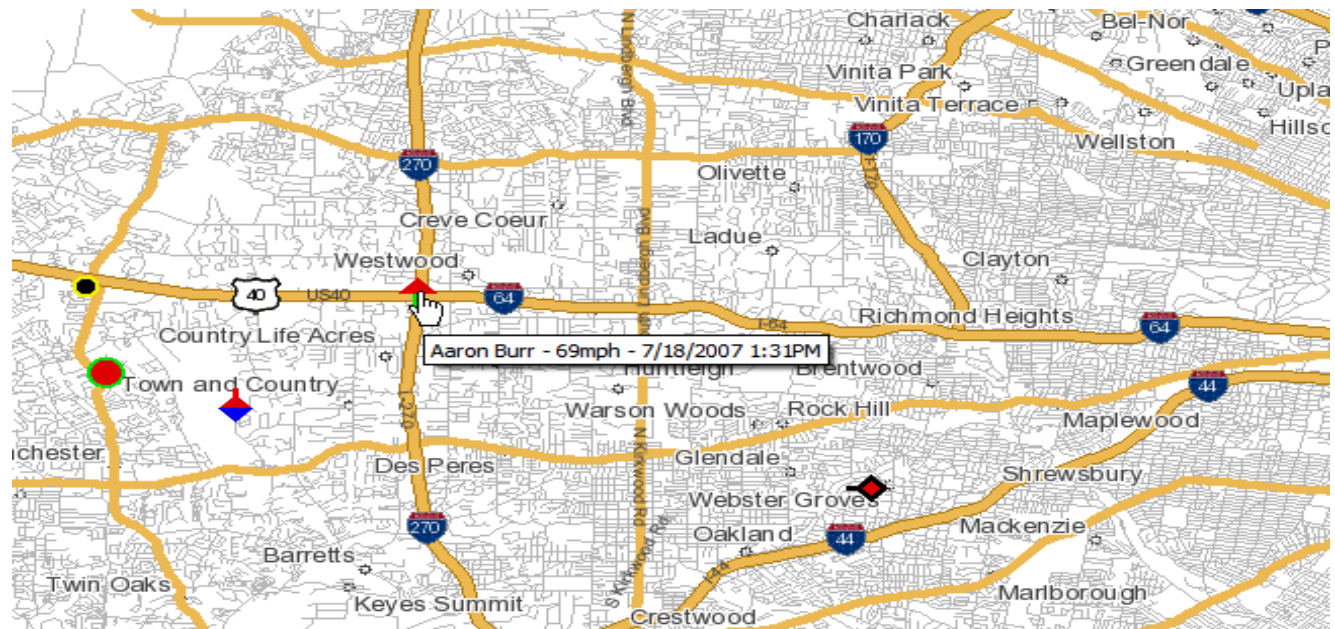

Simple Install

Just put tracking devices in your vehicles and you're ready to go.

No long-term contract

No Contract...No Yearly Activation Fees...1st Month of Service is FREE... 30 Day Money Back Guarantee!

Seasonal businesses will save money by turning on the service during peak months and shutting it off during non peak months
